Apply Fire Fighting Techniques

- Unit standard: 252250
- NQF Level: 1
- Credits: 3
- Course Duration: 1 Day
- Venue: On-Site or at the FBT Assessment Centre
- Training Intervals: 2 Years

PURPOSE OF THE UNIT STANDARD

When faced with extraordinary situations, anything can happen. With proper training and education, the ability to make the right decisions in these extraordinary situations is essential.

A learner credited with this unit standard will be capable of identifying, containing, preventing, and extinguishing different types of fires by operating basic firefighting equipment.

THE QUALIFYING LEARNER WILL BE CAPABLE TO

Identify. Explain. Operate

WHAT IS BASIC FIREFIGHTING?

Basic firefighting is about bringing fires under control and putting the fires out. Basic firefighting will teach you the necessary skills to identify the type of fire quickly and correctly so that you can select the appropriate firefighting procedure. Prevention is always better than cure.

LEGISLATION

Various regulations which are part of the OHS Act directs the employer to ensure that the necessary steps are taken to ensure proper fire-fighting equipment is provided and measures are put in place for emergency purposes. Sufficient numbers of employees must be trained in the use of fire-fighting equipment. These regulations include:

General Safety Regulations (GSR), Reg (4). Use and storage of flammable liquids, Sub reg (11) and GSR, Reg (9). Welding, flame cutting, soldering and similar operations, Sub reg (5).

Environmental Regulations for Workplaces (ERW), Reg (9).

Construction Regulations 2014 (CR), Reg (29) Fire precautions on construction sites.

Noncompliance with the OHS Act and the Regulations may lead to huge fines and imprisonment (check sections on offences and penalties).
